1. Why do you want to be a member of a Board/Commission/Committee? What do you feel you could contribute?

I was raised in Union City and I care about maintaining the things that make Union City a great place to live. I believe I can make a positive impact for Union City by using my background in economics on the Planning Commission. During my work experience with the Board of Equalization and U.S. Bureau of Labor Statistics, I've developed the research, analytical and communication skills needed to be on the Planning Commission.

2. What qualifies you for this appointment?

I received a Bachelor's Degree in Economics from UC Berkeley after transferring from Chabot College. I was a sales tax collector with the State of California. I interacted with owners of several different types of industries and business sizes. These interactions helped give me a new perspective on the challenges faced by business owners, particularly small business owners.

For the past 8 years, I have worked with the U.S. Bureau of Labor Statistics as an economist with the National Compensation Survey division which produces data for the Employment Cost Index and the Occupational Requirements Survey. I believe knowledge of economic principles, data analysis and labor market trends can be utilized on the Planning Commission to promote Union City's economic growth and community development.

3. What is your vision for the committee/commission to which you are applying?

As a member of the Planning Commission, I hope to help Union City continue to be a vibrant community. The Planning Commission plays an important advisory role to the City Council. The housing shortage, climate change, efficient use of land, fiscal health and infrastructure are some of the important issues facing not just Union City but many other parts of the country. I hope I can make a positive contribution working alongside the other commissioners, city staff, City Council, local business and residents to address these issues.
